

# ASKING FOR MORE THOROUGH RULES ON GARBAGE SEPARATION

In order to prevent infection with the new coronavirus.  
Please separate plastic bottles, cans, and bottles !

Please follow “How to Dispose of Garbage such as masks”, and keep in mind that;

- **do not touch the garbage directly**
- **tighten and seal the garbage bag**
- **wash your hands after you throw away the garbage**

Ministry of the Environment  
Government of Japan

## How to dispose the garbage

① Put a garbage bag on the trash can. Seal the garbage bag as soon as possible before it fills up.

③ After throwing away the garbage, use soap and wash your hands well with running water.

② Seal the bag tightly so that any hands do not come into direct contact with trash such as masks.

Follow the rules of your local government when throwing away garbage and never litter. Please refer to "How to Dispose of Garbage" when throwing away used masks and other garbage.

**If you have poor manners for garbage separation,  
We have no choice but to suspend the separate  
cleaning of the rubbish storage area.**
